VOLUME 14

1958

PERGAMON PRESS LONDON • NEW YORK • PARIS • LOS ANGELES

CONTENTS

Nos. 1/2

DOROTHY CARROLL: Role of clay minerals in the transportation of iron	1
ANDREW B. VISTELIUS: Paragenesis of sodium, potassium and uranium in volcanic rocks of Lassen Volcanic National Park, California	29
G. S. BIEN, D. E. CONTOIS and W. H. THOMAS: The removal of soluble silica from fresh water entering the sea	35
W. O. ROBINSON, H. BASTRON and K. J. MURATA: Biogeochemistry of the rare-earth elements with particular reference to hickory trees	55
R. M. MCKENZIE, A. C. OERTEL and K. G. TILLER: Analyses of the standard rocks G1 and W1	68
H. G. MACPHERSON: A chemical and petrographic study of Pre-Cambrian sediments	73
HARRY LEVINE and FRANK S. GRIMALDI: Determination of thorium in the parts per million range in rocks	93
W. GENTNER und W. KLEY: Argonbestimmungen an Kaliummineralien—V. Altersbestimmungen nach der Kalium-Argon-Methode an Mineralien und Gesteinen des Schwarzwaldes	98
K. R. MEHNERT: Argonbestimmungen an Kaliummineralien—VI. Die geologische Entwicklung des Schwarzwald-Grundgebirges anhand absoluter Altersbestimmungen nach der K-A-Methode	105
R. CASTAING and K. FREDRIKSSON: Analyses of cosmic spherules with an X-ray microanalyser	114
G. L. BATE, H. A. POTRATZ and J. R. HUIZENGA: Thorium in iron meteorites: a preliminary investigation	118
P. W. HODGE and R. WILDT: A search for airborne particles of meteoritic origin	126
L. CAHEN, P. EBERHARDT, J. GEISS, F. G. HOUTERMANS, J. JEDWAB and P. SIGNER: On a correlation between the common lead model age and the trace-element content of galenas	134
Report of Meeting Symposium on Geochemistry, Paris, 22-24 July 1957	150
Geochemical Note G. V. CHILINGAR: Chemical composition of oil-field waters from Apsheron Peninsula, Azerbaidzhan SSR: A summary	168
Letters to the Editor S. DEUTSCH, E. PICCIOTTO and F. G. HOUTERMANS: Alpha radioactivity of iron meteorites (second letter)	173
J. F. LOVERING: A typical parent meteorite body	174
R. EULER und E. HELLNER: Hydrothermale und röntgenographische Untersuchungen an gesteinsbildenden Mineralen—IV. Über hydrothermal hergestellten Agirinaugit	177
Book Reviews "Recent Research in Climatology" Edited by <i>Harmon Craig</i> (reviewed by EARL INGERSON)	179
"Target, Earth: The Role of Large Meteors in Earth Science" by ALLAN O. KELLY and FRANK DACHILLE (reviewed by EARL INGERSON)	179
"Kleine Meteoritenkunde" by F. HEIDE (reviewed by F. A. PANETH)	180
News and Notes	181
Papers to be published in future issues	183

No. 3

EARL INGERSON: The next decade in geochemistry	185
D. H. ANDERSON and H. E. HAWKES: Relative mobility of the common elements in weathering of some schist and granite areas	204
W. ERNST, K. KREJCI-GRAF und H. WERNER: Parallelisierung von Leithorizonten im Ruhrkarbon mit Hilfe des Bor-Gehaltes	211

STANKO MIHOLIC: Radioactive waters from sediments	223
GREGOR JUNK and HARRY J. SVEC: The absolute abundance of nitrogen isotopes in the atmosphere and compressed gases from various sources	234
F. H. RAINWATER and W. F. WHITE: The solosphere—its inferences and study	244
J. MOUM and I. TH. ROSENQVIST: Hydrogen (protium)—deuterium exchange in clays	250
Geochemical Note:	
W. B. HAMILTON: Information needed with analytical data	253
Book Review:	
“L'Evolution de la Lithosphere. I: Petrogenese” by HENRI et GENEVIEVE TERMIER (reviewed by T. F. W. BARTH)	255
Papers to appear in future issues	256

No. 4

Symposium on Tektites

IRVING FRIEDMAN: Foreword	257
E. L. KRINOV: Some considerations on tektites	259
V. E. BARNES: Properties of tektites pertinent to their origin	267
A. J. COHEN: The absorption spectra of tektites and other natural glasses	279
J. S. RINEHART: Impact effects and tektites	287
C. M. VARSAVSKY: Dynamical limits on a lunar origin for tektites	291
W. A. CASSIDY: Achondrite investigations and their bearing on the origin of tektites	304
IRVING FRIEDMAN: The water, deuterium, gas and uranium content of tektites	316
G. R. TILTON: Isotopic composition of lead from tektites	323
W. H. PINSON, JR., L. F. HERZOG, H. W. FAIRBAIRN and R. F. CORMIER: Sr/Rb age study of tektites	331
W. D. EHMANN and T. P. KOHMAN: Cosmic-ray-induced radioactivities in meteorites—I. Chemical and radiometric procedures for aluminium, beryllium and cobalt	340
W. D. EHMANN and T. P. KOHMAN: Cosmic-ray-induced radioactivities in meteorites—II. Al ²⁶ , Be ¹⁰ , and Co ⁶⁰ , aerolites, siderites, and tektites	364
Papers to be published in future issues	380

GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany*
PROF. E. INGERSON *Dept. of Geology, University of Texas, Austin 12, Texas, U.S.A.*
PROF. L. R. WAGER, F.R.S. *Dept. of Geology and Mineralogy, The University, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernatsky Institute, Moscow, U.S.S.R.*
PROF. F. E. WICKMAN *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers on geochemistry should be submitted to the editors for the appropriate country or language. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French, or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS L. H. (1952) The use of ionization potential—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 168.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α , β , γ , ω , ϵ , n , and vibration directions by X , Y , Z , O and E .
